

PRESS RELEASE

January 20, 2017
Fuji Pharma Co., Ltd.

Inauguration Ceremony celebrating the completion of the new facility OLIC (Thailand) Limited

OLIC (Thailand) Limited (hereinafter “OLIC”), subsidiary of Fuji Pharma Co., Ltd. (hereinafter “FUJI”), are pleased to announce that OLIC has built a new injection facility and a warehouse (hereinafter “New Facilities”) inside premises of OLIC and held an inauguration ceremony on January 19th 2017.

Eiji Takemasa, President & CEO of FUJI:

“We would like to express our appreciation for continuous supports from the authorities of Thai government and business partners until this completion. In order for FUJI group to continue to grow, it is important to stabilize the supply chain of high quality pharmaceutical drugs with competitive costs and to expand into the global market, this New Facility will take an important key part.”

About OLIC

OLIC is the largest pharmaceutical contract manufacturing organization in Thailand and conducting as a multinational companies' contract manufacturer. OLIC can manufacture variety of formulation such as pill, capsule, ointment, and solution forms, and with this New Facility, it will strengthen the injection drug manufacturing, which will expand the contract manufacturing range.

The New Facility has installed newest manufacturing equipments from Japan and Europe, and is compliance with PIC/S*¹ and GMP*² of Japan, United States, and Europe. Also, by acquiring FUJI's injection drug techniques and know-how transfer from FUJI, OLIC can provide high-quality pharmaceutical drugs to clients.

Upon the start of the New Facility, it is planned to manufacture vial injectable products, which was manufactured at FUJI's Toyama plant, and by this transfer, we can achieve cost competitiveness and it will contribute to FUJI group's profits. To fulfill FUJI groups expanding into the global market, we are scheduled to manufacture pharmaceutical drugs towards Thailand and other South-East Asian countries in the future.

We will continue to strengthen the manufacturing structure and provide high quality pharmaceutical drugs stably.

*¹ PIC/S (Pharmaceutical Inspection Convention and Pharmaceutical Inspection Co-operation. Scheme .)

*² GMP (Good Manufacturing Practice)
