Fuji Pharma Co., Ltd.

Fuji Pharma Executives Meet Thailand Minister of Science and Technology

Fuji Pharma Co., Ltd. was honored to receive a courtesy call from H.E. Dr. Atchaka Sibunruang, the Thailand Minister of Science and Technology, on October 2, 2017.

In a photograph taken at the head office of Sumitomo Mitsui Banking Corporation are Dr. Atchaka Sibunruang, Thailand Minister of Science and Technology (right side of front row), Bansarn Bunnag, the Ambassador of the kingdom of Thailand (middle of front row), Hirofumi Imai, Chairman of Fuji Pharma (second from right in the second row), and Eiji Takemasa, President of Fuji Pharma (second from left in the second row).

Dr. Atchaka visited us because of the company's significant operations in Thailand. In 2012, Fuji Pharma acquired OLIC (Thailand) Limited, which is located in Ayutthaya, and this company constructed a new factory in Thailand in 2017.

The visit began with Fuji Pharma Chairman Hirofumi Imai expressing his appreciation for the support of the Thailand Board of Investment for the construction of OLIC's new factory. Mr. Imai also talked about the performance of this factory following its completion. Next, Fuji Pharma President Eiji Takemasa provided information about plans to further strengthen OLIC's contract manufacturing organization business in Thailand, to start selling pharmaceuticals and to expand operations to other ASEAN countries in the future.

Dr. Atchaka replied that she recognizes and appreciates the accomplishments of the Fuji Pharma Group. She explained Thailand 4.0, which is a long-term economic model for the country that aims for the growth of industries that supply products with even more added value.

Dr. Atchaka also expressed her strong interest in our plans for using Thailand as a base for business activities in other countries and ended her remarks by saying that Thailand will consider providing more assistance to the Group.
